

SHUTTER POSITIONING & SIZING

STEP 1: Measure the height of your shutter

Option A:
Measure the height of the window opening

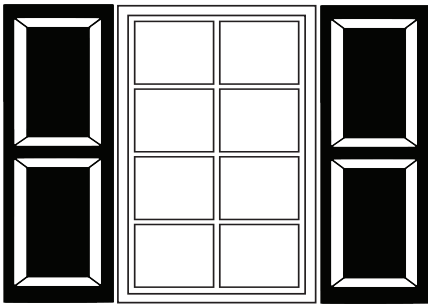

Option B:
Measure the height of the frame or trim surrounding the window

STEP 2: Selecting a shutter height

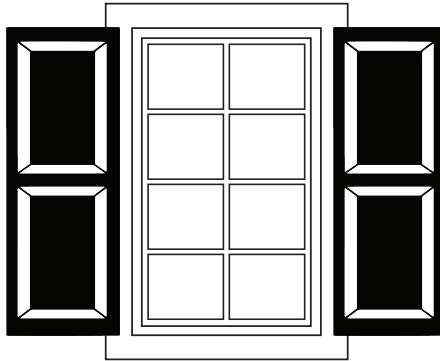

It is recommended to select a shutter size closest to your window size. When an exact option isn't available, it is recommended to select the largest, closest size.

STEP 3: Selecting the positioning of your shutter

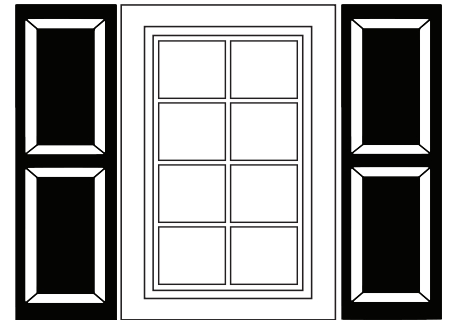

RECOMMENDED STYLE:
Shutter Size: Size of window opening
Position: Outside window opening

RECOMMENDED STYLE:
Shutter Size: Size of window opening
Position: Over window trim

RECOMMENDED STYLE:
Shutter Size: Size of window trim
Position: Outside window trim

OK Design:
Size: Size of window opening
Position: Outside window trim

OK Design:
Size: Size of window opening
Position: Over window trim

BAD Design:
Size: Smaller than window opening
Position: Outside window opening

BAD Design:
Size: Larger window opening
Position: Outside window opening
